

MANUAL 4 — SINGLE USER

MANUAL (Version 1)

Role: Single User

Audience: Individual customers using the system independently

1. Welcome

Welcome to the **Asset & Issue Prioritisation System**.

As a **Single User**, you use the platform to manage your own assets and report issues when something needs attention.

This manual is designed to be simple, clear, and easy to follow — even for users who are not technical.

2. Quick Start (1-Minute Overview)

1. Log in using your personal credentials.
2. Your dashboard shows:
 - Your assets
 - Your issues
 - Quick actions
3. Use the left menu to navigate:
 - **Assets**
 - **Issues**
4. Create issues or track progress anytime.

3. Your Role Explained

As a Single User, you:

- View your own assets
- Report issues
- Track issue progress
- Communicate with support through comments

You do **not** manage other users or company settings.

Your experience is simple and focused.

4. Navigation Guide

Dashboard

Shows:

- Your assets
- Your open issues
- Recent updates
- Quick links

Sidebar Menu

- **Assets**
- **Issues**

Everything is designed to be easy and intuitive.

5. Core Features

5.1 View Your Assets

You can:

- See all assets assigned to you
- View asset details
- Check asset status

How to View Assets

1. Go to **Assets**
2. Browse the list
3. Click an asset to view details

5.2 Create an Issue

If something is not working or needs attention, you can report it.

Steps to Create an Issue

1. Go to **Issues**
2. Click **Create Issue**
3. Enter:
 - Title
 - Description
 - Priority
 - Asset (optional)
4. Submit

Your support team will review and respond.

5.3 Track Issue Progress

You can:

- See issue status
- View comments
- Follow updates
- Know when the issue is resolved

How to Track

1. Go to **Issues**
2. Select the issue
3. View status and comments

5.4 Add Comments

If support needs more information, you can reply directly inside the issue.

How to Comment

1. Open the issue
2. Scroll to the comments section
3. Type your message
4. Submit

This keeps communication clear and organized.

6. Best Practices

- Report issues as soon as you notice them
- Provide clear descriptions
- Attach screenshots if available
- Check your dashboard regularly
- Respond to support comments promptly

These habits help resolve issues faster.

7. Troubleshooting

Issue not visible

- Refresh the page
- Check if you created it under your account

Cannot create issue

- Ensure required fields are filled
- Check your internet connection

Asset missing

- Contact support to verify assignment

8. Future Enhancements (Placeholder)

- Notifications
- Mobile app
- Auto-prioritisation
- Asset reminders
- Chat-based support

9. Support

For help, contact your support team or the company that provided your assets.
