

COMPANY ADMIN USER MANUAL (Version 1)

Role: Company-Level Administrator

Audience: Company owners, managers, or internal administrators

1. Welcome

Welcome to the Asset Management Prioritisation Tool.

As a Company Admin, you manage everything inside your company:

- Users
- Assets
- Issues
- Roles
- Company-level settings

This manual helps you understand your responsibilities and guides you through all Version 1 features available to you.

2. Quick Start (1-Minute Overview)

1. Log in using your company admin credentials.
2. Your dashboard shows company-wide asset statistics and task summaries.
3. Use the top navigation bar to access:
 - Home (Dashboard)
 - Issues
 - User Info
 - Logout
4. Use the sidebar to access:
 - Dashboard Metrics
 - Top Priorities
 - Mapping (if enabled)
5. Begin by adding assets, then manage issues as they arise.

2.1 Company Admin Signup and Login

Signing Up as a Company Admin

1. Navigate to the signup page.
2. Select the "Company Admin" role during registration.
3. Provide required details such as company name, your name, email, and password.
4. Submit the form to create your admin account.
5. You may receive a confirmation email to verify your account.

The screenshot shows a web interface for the 'ASSET MANAGEMENT PRIORITISATION TOOL'. At the top, it says 'WELCOME' and 'ASSET MANAGEMENT PRIORITISATION TOOL'. Below this is a 'USER SIGNUP' form. The form contains the following fields: 'Company' (text input), 'Admin' (text input), 'CompanyAdTest1' (text input), 'company.admin@gmail.com' (text input), a password field (masked with dots), a dropdown menu with 'Company' selected, another dropdown menu with 'Company Admin' selected, and a text input 'Comp A'. A green 'Sign Up' button is at the bottom of the form. Below the button, it says 'Already have an account? [Login](#)'.

Logging In as a Company Admin

1. Go to the login page.
2. Enter your registered email and password.
3. Click the "Login" button.
4. Upon successful authentication, you will be redirected to your Company Admin dashboard.
5. If login fails, verify your credentials or use the password recovery option.

Creating Company Admin User Links

Company Admins can create user invitation links to onboard new users quickly:

1. Navigate to the User Management section.
2. Click on "Create Invitation Link".
3. Specify the role and permissions for the invited user.
4. Generate the link and share it securely with the new user.

5. The invited user can use the link to sign up and will be automatically assigned the specified role.

A screenshot of a web application titled 'WELCOME ASSET MANAGEMENT PRIORITISATION TOOL'. It features a 'USER SIGNUP' form with fields for 'First Name', 'Last Name', 'Username', 'Email', and 'Password'. A green 'Sign Up' button is at the bottom of the form, and a link 'Already have an account? Login' is below it. The background is a green and blue abstract design.

Adding New Client Groups (Admin ClientGroup Page)

To add new client groups, use the Admin ClientGroup page:

1. Navigate to the Admin ClientGroup page.
2. Click "Add New Client Group".
3. Enter the client group name and any relevant details.

A screenshot of the 'Client Group Management' page in a web application. The page has a dark header with 'Home', 'Issues', 'CompanyAdminTest2 (company_admin)', and 'Logout'. A 'Go to Dashboard' button is in the top right. The main content area has a form with 'Client Group Name' (containing 'Alpha Company') and 'Access Code' (containing 'Alpha-123'). There is a 'Generate' button next to the access code field and a 'Create Client Group' button at the bottom.

4. Assign assets or users to the client group as needed.

5. Save the new client group to make it active.

The screenshot shows the 'Client Group Management' interface. At the top, there's a navigation bar with 'Home', 'Issues', 'CompanyAdminTest2 (company_admin)', and 'Logout'. A 'Go to Dashboard' button is in the top right. The main form has two input fields: 'Client Group Name' with the value 'Alpha Company' and 'Access Code' with the value 'KBT7-1TDQ-TGM6'. There is a 'Generate' button next to the access code field and a 'Create Client Group' button at the bottom of the form.

This process helps organize assets and users under specific client groups for better management and reporting.

This screenshot shows the 'Client Group Management' interface after a group has been created. The 'Client Group Name' field now contains 'e.g. ABC Company, John Smith'. The 'Access Code' field has a placeholder 'Type or generate access code' and a 'Generate' button. Below the form, there is a section titled 'Existing Client Groups' containing a table with one entry: 'ABC Infrastructure' created on '23/12/2025, 09:37:05'. The table has columns for 'Select Role' (set to 'Viewer') and 'Generate Invite Link'.

3. Your Role Explained

As a Company Admin, you are responsible for:

- Managing all users within your company
- Assigning roles (e.g., company_user)
- Managing assets
- Managing issues
- Ensuring smooth operations
- Maintaining accurate company data

You do **not** have access to other companies or global settings.

4. Navigation Guide

4.1 Dashboard Overview

The Dashboard provides a high-level summary of asset-related activity and prioritisation. It includes:

- **Total Tasks** — Number of tasks linked to assets, including open and completed counts

- **Highest Risk Rating** — Highlights the most critical issue based on risk score (if available)
- **Assets per Client Group** — Shows how many assets are registered under the current company group
- **Total Assets** — Displays the total number of assets managed by the logged-in company
- **View Asset Log** — Opens the full asset table

4.2 Top Navigation Bar

Visible across all pages:

- **Home** → Returns to the Dashboard
- **Issues** → Opens the Issue List page
- **User Info** → Displays the logged-in user and role
- **Logout** → Ends the session

4.3 Sidebar Menu (Left Panel)

Provides access to asset-related modules:

- **Dashboard Metrics** → Current asset and task summary
- **Top Priorities** → High-risk assets or tasks
- **Mapping** → Visual map of asset locations (if enabled)

Note: User Management is not yet linked in the UI, but backend and frontend code are available.

5. Core Features

5.1 Manage Users

You can:

- Add new users
- Edit user details
- Assign roles
- Activate/Deactivate users

Add a New User

1. Go to Users (once UI link is added)
2. Click **Add User**
3. Enter:
 - Name

- Email
- Role

4. Click **Save**

Edit a User

- Update role
- Activate/Deactivate

5.2 Manage Assets

You can:

- Add assets
- Edit assets
- Assign assets to users
- Search and filter assets

Add an Asset

1. Go to Assets
2. Click **Add Asset**
3. Enter:
 - Asset Name
 - Category
 - Serial Number
 - Assigned User
4. Click **Save**

Edit an Asset

- Update asset details
- Reassign to another user

5.3 Manage Issues

You can:

- View all issues in your company
- Create issues
- Update issue status
- Assign issues to users
- Add comments

Create an Issue

1. Go to Issues
2. Click **Create Issue**
3. Enter:
 - Asset
 - Title
 - Description
 - Score
 - Mitigation
4. Click **Submit**

Water Leakage in Basement – Pump Room

Issue Description

Water is leaking continuously near the pump room in the basement.
The floor is wet and slippery, and the leak appears to be coming from a damaged pipe joint.

Score

85

Mitigation

Placed caution signs around the wet area.
Requested maintenance team to inspect the pipe immediately.

6. Best Practices

- Keep user roles updated
- Assign assets carefully
- Resolve issues promptly
- Encourage users to report issues early
- Maintain accurate asset records
- Review issue trends regularly

These practices help your company operate smoothly and safely.

7. Troubleshooting

User cannot log in

- Ensure the user is active
- Ensure the user has a role assigned

Asset not visible

- Check if the asset is assigned to the correct user
- Check if the asset is active

Issue not updating

- Refresh the page
- Check your internet connection

8. Future Enhancements (Planned)

- Auto-prioritisation engine
- Notification system

- Asset lifecycle tracking
- Audit logs
- Mobile app
