

MANUAL 1 — APP ADMIN USER

MANUAL (Version 1)

Role: System-Level Administrator

Audience: Internal team or top-level client administrators

1. Welcome

Welcome to the **Asset & Issue Prioritisation System**.

As an **App Admin**, you have the highest level of access.

You control the entire platform, including companies, client groups, roles, permissions, and global settings.

This manual guides you through everything you can do in Version 1.

2. Quick Start (1-Minute Overview)

1. Log in using your admin credentials.
2. Your dashboard shows system-wide statistics.
3. Use the left menu to navigate:
 - Companies
 - Client Groups
 - Users
 - Roles
 - Permissions
 - Assets
 - Issues

4. Perform actions like creating companies, assigning admins, and managing permissions.

3. Your Role Explained

As an App Admin, you are responsible for:

- Creating and managing companies
- Creating and managing client groups
- Assigning company admins
- Managing global roles and permissions
- Viewing all issues and assets across the system
- Ensuring data consistency and security

You have **full access** to all modules.

4. Navigation Guide

Dashboard

Shows:

- Total companies
- Total users
- Total assets
- Total issues
- Recent activity

Sidebar Menu

- **Companies**
- **Client Groups**
- **Users**
- **Roles**

- **Permissions**
- **Assets**
- **Issues**

Each section opens a dedicated management page.

5. Core Features

5.1 Manage Companies

You can:

- Create a new company
- Edit company details
- Assign a Company Admin
- Activate/Deactivate a company

Steps to create a company:

1. Go to **Companies**
2. Click **Add Company**
3. Enter company details
4. Assign a Company Admin
5. Save

5.2 Manage Client Groups

Client groups help organize companies.

You can:

- Create client groups
- Assign companies to groups
- Edit group details

5.3 Manage Roles

You control system-wide roles.

You can:

- Create roles
- Edit roles
- Assign permissions to roles

5.4 Manage Permissions

You define what each role can do.

You can:

- Enable/disable permissions
- Assign permissions to roles
- Review permission mappings

5.5 Manage Users

You can:

- View all users
- Edit user details
- Change user roles
- Activate/Deactivate users

5.6 Manage Assets

You can:

- View all assets across all companies
- Edit asset details
- Reassign assets

5.7 Manage Issues

You can:

- View all issues
- Filter by company, status, priority
- Update issue status
- Reassign issues

6. Best Practices

- Keep company and user data clean
- Assign roles carefully
- Review permissions regularly
- Deactivate unused accounts
- Maintain consistent naming conventions

7. Troubleshooting

Cannot create a company

- Check if the company name already exists

User cannot log in

- Ensure the user is active
- Ensure the user has a role

Permissions not applying

- Refresh user permissions
- Ensure the role has correct permissions

8. Future Enhancements (Placeholder)

- Audit logs
- Advanced analytics
- Notification system
- Auto-prioritisation engine

9. Support

For help, contact your internal support team or system administrator.
